**TITAN MEDIUM PRESSURE**

**PF261 & PF262 TITAN ATEX/IECEEx Exd, Exia CERTIFIED & INDUSTRIAL PRESSURE SWITCH**

This range has been used on rotating machinery and process applications worldwide and has been specified extensively for offshore applications. Diaphragm actuated for operating pressures up to 40 bar with a Bellofram option offering extremely low switching deadband. Resistors can be incorporated for 'end of line' and short circuit monitoring.

**FEATURES**

- 316 stainless steel or black anodised aluminium switchcase to IP66 standards.
- SIL2 - IEC61508 proven reliability
- Internal adjustment scale.
- ATEX/IECEEx Flameproof version
  - CE II2G Exd IIB + H2 T6...T2 Gb
  - Ta-60 to +75°C...90°C
- ATEX/IECEEx Intrinsically safe version
  - CE II1G Exia IIC T6...T2 Ga
  - Ta -50 to +78°C...128°C

PART NUMBER BREAKDOWN

PF261S1B/2W10F22B/22S6AA

SPRING CODE (SEE RANGE TABLE)  DIAPHRAGM OR BELLOFRAM CODE (SEE RANGE TABLE)

DIAPHRAGM MATERIAL
1 = NITRILE
2 = VITON
7 = VITON BELLOFRAM (LOW DEADBAND)

B = ATEX/IECEx Exd CERTIFIED
O = ATEX/IECEx Exia CERTIFIED
A = INDUSTRIAL

A = ALUMINIUM CASE
S = ST. STEEL CASE
1 = CASE MOUNTED
2 = STEM MOUNTED

WETTED PARTS
S = 316 STAINLESS STEEL
M = MONEL 400

ELECTRICAL ENTRY
A = M20 STRAIGHT
B = M20 ANGLED
C = 1/2” NPT STR.
F = M25 STRAIGHT

PROCESS CONNECTIONS
PF261 - FEMALE
10F = STANDARD (F)
PF262 - MALE
22F = 1/2” BSP.P (M)
24F = 1/2” NPT (M)

BOTTOM COVER CODE (SEE TABLE)

PROCESS THREAD
1 = 1/4” BSP.P FEMALE
2 = 1/4” NPT FEMALE
5 = 1/2” BSP.P FEMALE
6 = 1/2” NPT FEMALE
FOR PF262 USE = 1

NOTE: RESISTORS ARE INDICATED BY THE PREFIX “PR” IN PLACE OF “PF”.

SPECIFICATION

Wetted parts : 316 St. steel or Monel
Diaphragm : Nitrile or Viton

Process connections : 1/4” or 1/2” BSP.P or NPT female (bottom)
1/2” BSP.P or NPT male (bottom)
The Titan pressure, differential pressure, temperature, level and flow switches are designed for use in environments where explosive gases can be present (e.g. Gas fields, Oil rigs and Chemical plants etc.) and have been ATEX and IECEx certified as detailed overleaf. (SIL 2 - IEC61508 proven reliability).

These switches are manufactured from a high quality casting which offers robust construction and protection to IP66 for use within heavily polluted industrial and marine environments. A special feature of the instruments is the separation of the flameproof and adjustment compartments allowing for safe on-site adjustment of the set point with power on and the switch in operation.

The TITAN Exd certified switches must be installed in accordance with BS EN 60079-14. The certification allows for mounting against a wall or bulkhead with the minimum flamepath distances specified not being applicable.

**CALIBRATION**

The design features a simple form of calibration adjustment against a scale plate. This allows users to either order units with a specific setting, or stock a mid range setting and then adjust to suit the application. This can be set safely with the switch supply live. On removal of the adjustment cover the adjusting ring can be turned with a small Tommy bar or Allen key. The setting is read from the centre of the red pointer ring against the calibrated scale plate. Rotation to the left will increase the set point and to the right decrease the set point. The adjustment mechanism incorporates a friction device to ensure set point will not change under vibration conditions.
TECHNICAL SPECIFICATION

Switchcase and covers: 316 stainless steel or black anodised aluminium.

Microswitch: 1 x SPCO/SPDT or 2 x SPCO/SPDT gold flashed silver contacts. Dual switches are mechanically linked to provide DPDT switching action, reset of switches could be up to 3% apart. Dual microswitches may increase deadband by a factor of two.

Microswitch rating:
- 5 Amps @ 250 VAC resistive, 2 Amps @ 250 VAC inductive.
- 5 Amps @ 30 VDC resistive, 3 Amps @ 30 VDC inductive.

Electrical connections:
- Terminals suitable for cable 0.5 - 2.5 mm2.
  (Max 1.5mm2 for dual microswitch version)

Electrical Conduit Entry: M20 x 1.5 straight or angled entry. ½” NPT via adaptors

Environmental Protection: IP66 in accordance with BS EN 60529

Vibration and shock parameters: Switches were subjected to Ministry of Defence Type Approval System Test Vibration DGS 350 Paras 0602 & 0603. Shock – BR3021

Temperature Limitations: Pressure, Vacuum and Differential Pressure.

Process: Diaphragm actuated (unless otherwise stated) -30 to +100°C (Nitrile) or -20 to +150°C (Viton). Piston actuated -30 to +100°C (Nitrile) or -20 to +150°C (Viton), -40 to 150°C (PTFE) or -35 to +100°C (EPDM). Ambient: -50 to +85°C (standard). Storage: -60 to +85° Deg C.

Certification: Switches can be supplied for gas environments (dust must be specified at time of enquiry).

ATEX/IECEx certified Exd Flameproof - Gas (with or without resistors)
CE Ex II2G Exd IIB + H2T6 Ta -60 to +75°C, T5 Ta +90°C
Special conditions for safe use. 1) No modifications must be made to the flamepaths of the unit without consultation of the drawings listed on the certificate. 2) Suitably rated cable must be selected based on t Class shown above. 3) Fasteners of yield strength 240nm2 or greater are to be utilised. 4) Only suitably certified Ex d IIC Gb cable glands are to be used.

ATEX/IECEx certified Exia Intrinsically Safe - Gas
CE Ex II1G Exia IIC T6 Ta -50 to +78°C, T5 Ta +93°C, T4 Ta +128°C
CE Ex II1G Exia IIC T5 Ta -50 to +72°C, T4 Ta +122°C (with resistors)
Special conditions for safe use. (Category 1, Zone 0) Aluminium may only be used when the ignition hazardous assessment shows that there is no risk of ignition from incendive, impact or abrasion sparks.

Accuracy: +/-1% at 20°C

Continuous development may result in changes to specifications without prior notice.

ABOUT PYROPRESS

Our products are designed to work in demanding and hazardous environments which require fast and cost effective solutions in instrumentation and control.
Pyropress control sensors provide safe and reliable electrical switching of alarm or control circuits in response to changes in temperature, differential pressure, vacuum, flow and level conditions.

QUALITY

To support the design of state of the art products the company has invested heavily in the latest CNC technology.
We are able to produce our own components to a high degree of accuracy assuring a reliable and consistent quality product.
